

Top Reasons You Are Not Yet Seeing Your Visualizations Come to Manifestation...and How to Change Each One (including actionable steps)!

www.drchristinetopjian.com

Hello Friend,

If you have been visualizing for a little while but you are not yet seeing your visualizations come to manifestation (as in, you've been seeing the end result in your mind's eye but it hasn't yet appeared in real life), then I am here to give you some possible reasons the manifestation has not yet

happened for you and what to do about each. Feel free to print out this mini guide so you can get a better idea of how to blast through those pesky challenges and step out successfully on the other side!

Here are your possible reasons:

- 1. You have not been consistent in seeing it - it takes a fair bit of time to consistently visualize and see each of the little details that help render the visualization more real and therefore more attainable. If you are not yet seeing it manifest, know that you probably have to be more consistent at seeing it. (I see the things I want at least/ minimum) once per day for about 9-10 mins. For things I want to manifest more quickly, I see them for longer or I do the visualizing 2-3 times per day.*
- 2. You have not been specific in seeing the little details - this goes a long way. You have to spend a good amount of time seeing the little details. For example, for a new job offer, I recommend seeing the email offering you the job and then seeing up-close the letters of the company or the organization, see yourself being addressed (Dear) and then see the body of the letter offering you the job with the exact specifications that you want. This will supercharge your visualizations!*

3. Give thanks to God before you get it. This is really important and totally Biblical - it's important to give thanks to God for it (and for the blessings we already have) today. It's called an attitude of gratitude.

4. *Time - I have to lay this one out plain Jane. It takes time to see the thing we desire manifest. There is no way around that and people who tell you that you can make something happen in 24-48 hours are usually trying to sell you something that isn't going to work. I have been using visualization for many years and I've been successful at seeing many things visualize but when we don't give it the time and the effort it needs, it simply is not going to work.*

While you are waiting for it to manifest, keep seeing it. I cannot stress this enough. Take the time each day to see it and in time (God's timing, not yours) you will see it come to fruition.

5. *Speak it as done - if you are seeing it as done but your words are saying the opposite, then you are not doing what you are supposed to be doing. You have to speak as though you are living it today and you will get to see it manifest. You cannot walk around thinking success but speaking defeat - it will hamper the blessing from manifesting.*

Have Faith

One of the most important parts of visualizing is to have faith in God that He (I always put the capital H for respect) will make it happen. This requires some faith. You don't have to be a Christian and you don't have to spend oodles of money or anything like that. Faith as small as a mustard seed (literally the smallest seed there is) is what you need along with your practice of visualizing and seeing it and speaking it in faith.
